### Apex Dynamics USA Releases the NEW STAINLESS STEEL Precision Helical AE Series

Apex Dynamics releases the new Medium Precision Helical AE series, which utilizes our one-piece shaft carrier design (Patent # 6503168). Supported with our oversized ball bearing straddle mount for increased radial and axial loading capacity. Stainless Steel output housing along with 100% patented sealing technology (IP65) creates a perfect low cost servo grade gearbox for every application.

The overall thickness of the New AE planet gears and increased tooth-to-tooth contact ratio creates torque capacities of over 100% vs. the standard spur gearing geometry (Competitive Models). The Helix angle is optimized and produces smooth and quiet operation at extreme speeds. (Less than 8 arc-min, less than 56dB, up to 10,000rpms input).

The product is offered in 7 sizes (AE 050,070,090,120,155,205,235) and is equipped with every single stage ratio (3,4,5,6,7,8,9 & 10:1) along with more binary (double stage) ratios than any other competitor.

Covered by the industry leading 5-year tip to toe warranty and delivery is guaranteed with in two weeks or it's FREE.

**The Most Productive Helical Planetary Gearhead Manufacturer in the World!**
